Education

Gandhi Institute of Technology and Management

Aug. 2022 – May. 2026

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.23

Visakhapatnam, AP

Skills

Programming: Python, SQL, HTML/CSS

Libraries: Pandas, NumPy, Matplotlib, scikit-learn, PyTorch TabNet, imbalanced-learn

Data Analytics: Excel, Data Transformation, Exploratory Data Analysis (EDA), ETL, KPI Analysis

Databases & Cloud: MySQL, AWS (EC2, S3, Lambda, Elastic Beanstalk)

BI & Reporting: Power BI, Tableau, Looker Studio - Dashboard Development, Automated Reporting, DAX

Projects

NIFTY Sector Performance Analysis | Excel, SQL, MySQL, Power BI

- Analyzed 10+ years of NSE data (17,000+ records) across 6 NIFTY sector indices, benchmarking sector performance against NIFTY 50 to evaluate long term return and risk trends.
- Identified NIFTY Auto as the highest return sector (224.30%) and NIFTY FMCG as the most resilient, with the lowest volatility (16.24%) and maximum drawdown (-31.32%) over the 2015 - 2026 analysis period.
- Built an automated SQL ETL pipeline and a reporting view to centralize financial calculations and prepare analytics ready data for Power BI.
- Developed a 4 page interactive dashboard with 15+ DAX measures to analyze sector performance, CAGR, volatility, maximum drawdown, and investment growth.

HR Analytics Dashboard | Excel, Power BI

- Developed an interactive workforce analytics dashboard for 311 employees to support retention, compensation, and workforce planning decisions.
- Performed data modeling, validation, KPI development, and DAX based calculations to ensure accurate business reporting and performance tracking.
- Generated quantitative insights by identifying a 40.15% attrition rate, high risk departments, employee exit drivers, and engagement trends, supporting strategic workforce planning and continuous improvement initiatives.

MindTrack Mental Health Prediction | Python, Google Colab, Microsoft 365 (for presentation and report)

- Led research on machine learning approaches for mental health prediction using PHQ-9 and wearable datasets.
- Evaluated multiple predictive models through comparative analysis, focusing on accuracy and robustness.
- Applied data preprocessing and SMOTE based balancing techniques to improve model performance and reliability.
- Identified TabNet as the optimal model, achieving 92.7% accuracy on PHQ-9 data and 96.1% accuracy on wearable data.

Experience

AWS & EduSkills (AICTE Certified)

April 2025 – June 2025

AI/ML Intern

Remote

- Applied AWS services including EC2, Lambda, and Elastic Beanstalk to support cloud based ML workflows.
- Designed and tested deployment pipelines for machine learning solutions, gaining exposure to end-to-end software development and deployment processes.
- Documented technical findings and best practices to support knowledge sharing and continuous learning.

ServiceNow

June 2025 – August 2025

System Administrator Intern

Remote

- Configured user access controls, incident workflows, and service catalog components within the ServiceNow platform.
- Supported workflow automation and issue management processes in a fast paced enterprise software environment.
- Collaborated with a 4 member team to execute operational tasks, maintain documentation, and ensure effective communication across activities.
- Gained practical exposure to enterprise SaaS systems, workflow management, and customer support processes.

Certifications

Python Essentials (Cisco), Deloitte Data Analytics Simulation (Forage), Google Data Analytics (Coursera)

Extra Curricular Activities

G-Sports Cricket Club

Event Coordinator & Team Member

- Organized inter college cricket tournaments for 100+ participants, coordinating event logistics, match scheduling, and team strategy while actively competing.
